EXPERIENCE

Full Stack Developer – Ignition Group – (dec/2023 – Present)
Remote role at a South Africa–based electronics company. Responsible for developing an automation platform to manage customer interactions and information flows between companies and users, using flowcharts to orchestrate multi-channel communication such as SMS, WhatsApp, and email.
Stack: C#, HTML5, CSS3, Javascript, .NET, Blazor, MudBlazor, MongoDB, React.js, Azure.

Prototype stack project – Ignition Group – (jun/2024 – aug/2024)
Designed and implemented a multi-platform GraphQL server composed of multiple configurable endpoints using Apollo GraphQL and MongoDB. The architecture allows easy creation and management of new projects and endpoints. One of the projects integrates Strawberry Shake on the front end within a .NET environment for a buy-and-sell marketplace application.
Stack: .Net, MongoDB, C#, Tailwind, Javascript, Node.js, Apollo GraphQL, Strawberry Shake

Frontend Developer – Mortar Learning – (nov/2022 – dec/2023)
Remote role at a UK-based start-up in the online education industry. Responsible for implementing new features across the platform. During the final three months, led the development team and oversaw all platform changes and deployments.
Stack: React, Next, Typescript, PostgreSQL, Tailwind, .NET core, Blazor.

Frontend Developer – Brasil Telões – (jun/2021 – oct/2022)
Development and maintenance of a landing page for a Brazilian company in the audio and video industry, including implementation of new features and content updates.
Stack: Php, React.js, SQL, Javascript, Bootstrap5, HTML5, CSS3, Cpanel, RestFul API.

Personal Project - AI travel Guide – (feb/2025)
Developed a travel recommendation tool that suggests well-known, highly visited, and historically significant tourist attractions. The application displays location-based recommendations on an interactive map, providing detailed information for each site. It integrates the OpenAI API as a data source and communicates with a fully custom-built GraphQL server. The front end is developed using React, JavaScript, Tailwind CSS, and the Leaflet mapping library.
Stack: OpenAI API, GraphQL, Node.js, React.js, Javascript, HTML5, CSS3, Leaflet

Languages: English C1 / Portuguese C2 / Spanish B2

SKILLS

Programming Languages: JavaScript, C#
Web Technologies: HTML5, CSS3, Node.js, Blazor, GraphQL
Frameworks/Libraries: .NET, Next.js, React.js, Tailwind CSS
Databases: MySQL, PostgreSQL, MongoDB
Version Control & CI/CD: Git, GitHub,GitHub Actions
Cloud Services: Azure

SUMMARY

Software Developer with over 5 years of experience in web and full stack development, working in international and remote environments across Europe and Africa. Currently pursuing a degree in **Computer Engineering** at **ESTGV** – **Instituto Politécnico de Viseu**. Strong background in design, automation, and modern web technologies, with a high interest in academic growth, international collaboration, and continuous learning.

EDUCATION

BSc in Computer Engineering
(sep/2025 – Present)
ESTGV – Instituto Politécnico de Viseu

Computer Science – CS50
(jan/2023 – may/2023)
Harvard University

Data Analysis – BigData
(aug/2023 – nov/2023)
Tokio School – lisbon

PERSONAL INTERESTS

Outside of my professional activities, I have a strong interest in technology and artistic expression, with a particular focus on music and painting. I participated in the television program *The Voice* (2017), an experience that contributed to the development of my confidence, discipline, and ability to perform in high-pressure environments. I also maintain an active lifestyle, exercising regularly, with a particular interest in weight training and running.
